Professional Summary

Software Developer and Computer Science graduate from Kasetsart University, Sriracha Campus. Experienced in developing full-stack web applications, integrating APIs, and building automation solutions through internship and academic projects. Proficient in Next.js, React, Node.js, PostgreSQL, and Docker. Contributed to SOC automation tools and cloud-based applications, with a strong interest in building reliable and scalable software systems.

SKILLS

- **Frontend:** Next.js, React, Vue.js, Tailwind CSS, Flutter
- **Backend:** Node.js, .NET, REST APIs
- **Database:** PostgreSQL, Firebase, Supabase
- **Tools:** Figma, Docker, Git, Postman, n8n, Burp Suite, Ubutu
- **Languages:** TypeScript, JavaScript, Python, C#, SQL

INTERNSHIP EXPERIENCE

26 MAY - 6 OCT 2025

BANGKOK MSP CO., LTD.(Thailand)

Position : Software Developer Intern

SOC Automation Implementation

- Led end-to-end development of internal SOC tooling, from workflow design to full-stack implementation across frontend and backend systems.
- Built an automation pipeline using Next.js, n8n, and PostgreSQL to automate CloudSEK credential report processing, significantly reducing manual processing time.
- Integrated CrowdStrike APIs into an n8n dashboard to centralize security alert monitoring and streamline incident management workflows.
- Developed an automated Slack notification workflow that polls REST APIs every 2 hours and tags assignees for overdue tasks.

Penetration Testing & Technical Training

- Identified security vulnerabilities across client API endpoints during grey-box penetration testing, including BAC, XSS, and Parameter Tampering, and delivered remediation reports with severity assessments and mitigation guidance.
- Co-delivered hands-on offensive security workshops for IT professionals at Mahasarakham University, covering Burp Suite and Turbo Intruder techniques while providing one-on-one technical guidance during practical exercises.

GRADUATION PROJECT | COMPUTER SCIENCE TESTING & EVALUATION HUB (CS-TEH)

1 JAN- 26 MAR 2026

Project Overview : Developed a scalable online coding examination platform for Kasetsart University's Computer Science department, replacing handwritten paper-based exams with an automated, real-time code evaluation system.

- Built a full-stack web application using Next.js and TypeScript with automated submission handling and real-time result processing.
- Integrated JudgeO API and Monaco Editor to support in-browser coding assessments across 5+ programming languages.
- Engineered a team-based competition system with live leaderboards, submission tracking, and audit logging for classroom coding activities.
- Managed deployment using Ubuntu, Docker, PostgreSQL, Redis, and JudgeO to support concurrent code execution and prevent submission conflicts.

EDUCATION

- **Kasetsart University, Sriracha Campus**
Bachelor's Degree in Science, Major in Computer Science

2022 - Present
